Work

Gusto - Software Engineer (Nov 2019 - Present)
I am currently working here and learning what it's like to not just write software, but also build a product at a fast-paced company. As a tech lead on multiple projects, I work closely with design, UX, product management, and data science. (Stack: Rails, React)

AdvicePay - Lead Developer (Aug 2018 - Nov 2019)
As lead developer, I learned to do things outside of writing code like owning sprint/roadmap planning, running retros/one-on-ones, and mentoring junior developers. (Stack: Go, VueJS, TypeScript)

Hireology - Software Engineer (Jan 2015 - Aug 2018)
I worked on the main platform and internal tooling, which included spearheading some standalone services in Go. (Stack: Rails, React, Go)

OpenMarkets - Full-stack developer consultant (Oct 2014 - Jun 2016)
This was my first programming job. I learned what it was like to work on a production codebase and unfortunately had to support IE8. (Stack: Rails, React, jQuery)

Skills

- **Languages:** Ruby, JavaScript, Go, TypeScript
- **Application frameworks:** Rails, React, VueJS
- **Testing frameworks:** RSpec, Jest, RTL, Capybara
- **Database/storage:** SQL (PostgreSQL, SQLite, MySQL), Redis, MongoDB
- **Other tools/integrations:** Heroku, AWS, Jira, Codeship, Stripe, DocuSign, HelloSign, Zuora, SalesForce, HubSpot, Git, GitHub, BitBucket, SendGrid, Mailgun, Twilio

Education

- **Dev Bootcamp Chicago (2014):** A 19 week intensive web development program
- **Oakton Community College (2014):** Completed a few classes to fulfill prerequisites for nursing school (I was originally planning to be a nurse). Left with a 4.0 GPA.
- **University of Illinois at Chicago (2011 - 2013):** Enrolled as a Honors College student for four semesters. Left with a 3.9 GPA.
